

## School Based Dental Program

Dear Parent/Guardian:

We are excited to be working with local schools to bring preventative dental services and dental education directly to children. If you enroll your child in the program, he/she will be seen by a NYS Licensed Dental Hygienist who will provide dental care and education that promotes healthy teeth and gums. Services include screening, cleaning, fluoride, sealants, education and referral for additional treatment if necessary. Upon completion of care, each child will receive an Oral Health Report Form indicating services provided.

All are welcome! If your child currently sees a dentist, he/she is still welcome to participate. We ask that you provide the information about your current dental provider on the consent form where indicated. Services will not be duplicated.

Families are not charged for services, only insurance companies if applicable. If you have dental insurance, we ask that you provide the insurance information to us. If your child does not have dental insurance, all services will be provided at **no cost**.

### Instructions:

To participate, please complete the front and back of the enclosed form and return to your child's school. If your child will NOT be participating in the program, please indicate this and return the form to their school.

### Dental Emergencies:

If your child has a dental emergency at any time of the day or night, call the office of his/her regular dentist if applicable. If your child does not have a regular dentist, call the Hudson Headwaters Dental Services Center at 518-623-3918.

## Dental FAQs and Tips:

### What are sealants?

- Sealants are a thin plastic coating painted onto the chewing surfaces of permanent teeth. They provide protection for your child's teeth by acting as a barrier to prevent cavities from damaging the teeth. Sealants can be applied by the Dental Hygienist.

### What is Fluoride?

- Fluoride is a naturally occurring mineral. It is present in drinking water at varying levels.
- Fluoride varnish is different. It is painted on the teeth. It is quick and easy to apply and **does not** have a bad taste.

### Brushing Tips

- Your child should always use a soft-bristled toothbrush.
- Toothbrushes should be replaced every **three** months.
- **Never** share a toothbrush. This can spread germs.

### Flossing Tips

- Flossing cleans between the teeth where a toothbrush can't reach.
- Your child can begin flossing when any two teeth touch.
